

True Hardware-Independent Imaging

What is the UIU?

Developed by Big Bang LLC in 2004, the Universal Imaging Utility (UIU) remains the only software application that can create ONE hardware-independent hard drive image (Windows® XP, Vista, 7) that can be easily deployed to any laptop or desktop regardless of manufacturer or model.

How does it work?

When used in conjunction with any existing imaging application such as Symantec Ghost, Altiris, Acronis, etc., the UIU creates ONE master Windows image that can be easily deployed to all hardware platforms. This eliminates the problems usually associated with multi-platform imaging—specifically, no more BSOD. In addition, the UIU incorporates a substantial driver database, continuously maintained by Big Bang LLC. Simply put, this allows Windows to recognize even the latest hardware, using the most current drivers available.

Where did the UIU come from?

The UIU was created to address the most common question asked by our customers—namely, “How can we create one Windows image that works on all of our hardware platforms?” In fact, since its introduction in 2004, UIU-prepared images have been deployed to millions of PCs worldwide.

Where does the ROI come from?

- Time** One master Windows image for your entire organization rather than multiple images for each platform.
- Consistency** . . . One image ensures that the same installation, configuration and policies are applied to every system in your organization.
- Support** One image reduces the disaster recovery time of any hardware platform to just minutes.
- Maintenance** . . . One image, updated regularly with security patches and anti-virus definitions, provides up-to-the-minute protection throughout each unique environment.

UIU Features

- New compatibility for Windows 7 64-bit
- New Windows 7 driver database including over 32,000 plug-n-play IDs
- Compatibility for Apple Mac Intel-based hardware
- Advanced OS-agnostic UIU Discovery Tool which allows users to ascertain hardware compatibility for all current Windows Operating Systems
- Modified Sysprep .xml answer files
- Enhanced unsigned driver handling

WHAT ARE OTHERS SAYING?

“The UIU paid for itself the first time we used it.”

– *Alex Barker,*
MIT Manager, Mountain America Credit Union

“This tool alone has increased my time and efficiency by 100%.”

– *Robert Rosales,*
IT Coordinator - San Diego, Brookfield Homes

“UIU is a terrific tool that we could not operate without!”

– *Mary Spada,*
Director of VPUL Technology Services, University of Pennsylvania

“The benefits of saved space, time saved, and consistent images make UIU well worth the investment.”

– *Jeff Rensink,*
Helpdesk Representative, Rosemount Inc.

“Ghosting new images is now just a minor task to be done on a regular basis.”

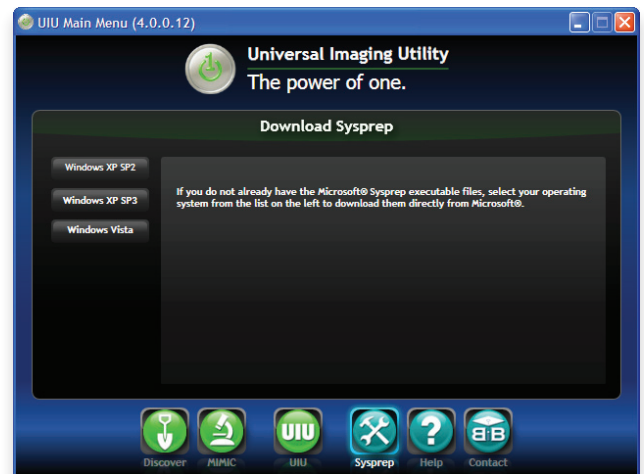

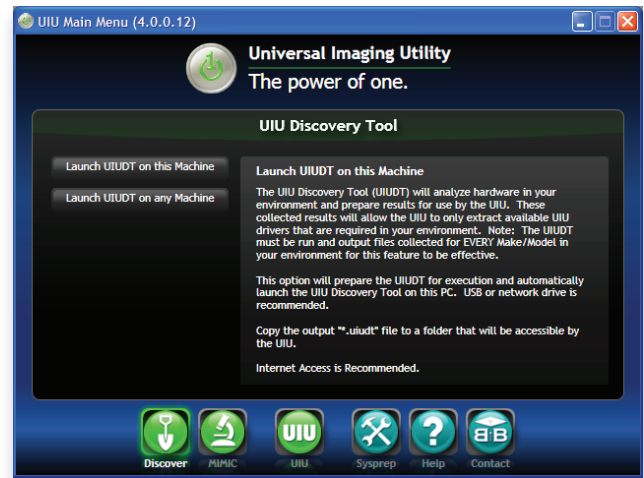

– *Nan Cusick,*
Technology Director, Independence High School, Glendale, AZ

UIU LICENSING

The UIU is licensed per machine (physical or virtual) to receive a UIU-prepared image. Please contact Paulette Hill with Professional Information Systems at 219-947-4349 or paulette@proinfosys.com for a more information or a detailed quote.

Licensing includes all updates, upgrades and support for a period of one year. Please contact your UIU representative for Annual Subscription Renewal rates.

Discounts are available based on number of seats and for qualified Government, Education and Non-Profit organizations.
